# Battery Industry News

**Exciting Industry Trends from the B.I.N.**

## MISSION STATEMENT

We at Sasha's International, Inc. are committed to bringing you the best prices, service and information. That is why we have created a monthly newsletter for our customers, letting them know some of the exciting new technologies and products that we are offering. As always, if you should need any specific part, information, or assistance with a product, please feel free to call, fax, or email us.

**-Dimitri Andonov, General Manager**

## NEWS

Clean-All Heavy Metals® Hand & Body Soap is formulated to remove heavy metals such as Lead, Mercury, Cadmium, and Cobalt as well as other less hazardous metals.

It's Important to stay safe when working with heavy metals such as lead in the battery industry. As always, we recommend using Clean-All to keep work areas free of contaminates. Check out our new informational blog at: [www.sashas.net/blog](http://www.sashas.net/blog)

## NEW EQUIPMENT SPOTLIGHT

### NEW PASTING MACHINE – SASHA'S " HEAVY DUTY CRAFT-PASTER"

Through years of experience in the field of battery pasting, we are proud to introduce a new affordable line of PASTING MACHINES and HOPPERS for your expanding battery plant. This PASTER and HOPPER will interface with your current equipment with a frame made of stress-free-steel, and stabilized after welding. All for a **terrific low price!**

This NEW PASTER includes:

- Two (2) sets of 20 Horse Gearmotors
- One (1) Paster Roller 15" or 12"
- One (1) Set of Pasting Shoes
- One (1) Belt
- Chrome Plated Bed Plate
- Optional: Standard 12" Hopper or Heavy Duty 15" Hopper

Very Competitive Price for such a terrific **NEW** machine! • Shortened delivery time. • **MADE IN THE U.S.A.**

Please contact us for more information: [sashas@sashas.net](mailto:sashas@sashas.net)

## NEW EQUIPMENT AVAILABLE

**NEGATIVE EXPANDER** – This new Expander is produced by blending various types and/or proportions of barium sulfate, carbon black, and Lignin (a wood derivative) to industry standards. Automotive and industrial battery manufacturers mix the expander, Lead oxide, sulfuric acid, and water to make the negative plate paste. The expander enhances the ability of the Lead-acid batteries to perform under various climatic conditions.

These Expanders are packed in various sized bags to meet your needs. For those customers wishing to obtain expander made to their own specifications, we have research and development facilities to make small sample batches for special performance testing.

**FLAME ARRESTORS** – These flame arrestors for battery vents help reduce the risk of explosions, control the release of gases and reduce the risks of acid leaks. Standard and custom sizes to fit even the most challenging battery cap designs. Custom sizes and quotes available upon request.

**LIKE NEW PARTER FOR SALE** - If you're looking for a replacement parter, look no further than this slightly used, XL200 Parter. Complete working condition, **terrific LOW PRICE!** Ships complete as soon as you place the order. Crated and boxed for export. Spare parts list available.

*Take advantage of this great deal before it's gone!*
